Brian found all but one. I'm checking with CH.

Jackie – when do you want to coordinate the sampling?

Hey Joyce,

Thanks Joyce.

Hi Jackie – If Stratus intends to send the bins for off-site disposal, then they need to have an approved waste profile. If their contents are already known and they are already covered by one of the existing waste profiles, then nothing further needs to be done. However, I suspect it won't be obvious whether they have high levels of contamination (requiring incineration) or low levels of contamination (requiring a hazardous or non-hazardous landfill), so you will probably want to sample them to figure that out.

Thanks!

Joyce

Thanks Tobi. Hopefully they will accept everything!

Joyce, those 5 bins are bins that the operators and myself could not find onsite when we were sampling the roll-offs, and therefore they were not sampled. Would you like us to sample those 5 bins if they are found?

Cheers,
Jackie

Joyce and Jackie

I asked Brian to see if he can track down these five (5) bins tomorrow. In the meantime I amended the BIN sheet based on the analytical data. I have a feeling I'm going to get a push back on a couple I submitted to Front Range but we'll see. I'm not 100% sure they are running off of 40 CFR 268.40 Treatment Standards since we are not applying U or F codes.

Once the two (2) pending profiles are approved I will amend to add pricing.

Please let me know if you have any questions or concerns.
